

TECHNICAL QUALIFICATIONS & APPROACH

In order to provide a thorough and accurate approach to this project, Michael Baker walked the project site on January 17, 2025, and also visited adjacent previously completed projects on Walnut Lane, Salem Drive, and Weathersfield Way. We have developed a summary of considerations that will need to be addressed specifically for these improvements based on the graphic below.

- Walnut Lane Project Limits
- Existing Off-Roadway Path
- Existing On-Roadway Path
- Potential 8-Foot Wide PCC Off-Roadway Path Location
- Enhanced Mid-Block Crossing to be Replaced; Flashing Beacons and Signage to Remain
- Key Stake Holder
- 1 **Cook County**- Intersection owned by Cook County- Coordination will be required for traffic signal loop replacements and a ROW permit for construction signage (Advanced Warning Signs and Road Construction Ahead Signs).
- 2 **Blackwell School**- Timing of construction operations are critical to the students, faculty and parents traveling to the school daily.
